

Intigam Guluzade - Backend Development Weekly Report (16-20 September 2024)

Done:

1. Phishing backend **authentication** part -> w JWT (login, register, forget-password, my-profile endpoints)
2. Phishing backend **Training** all endpoints -> CRUD
3. Nordic ID device development **management**
4. Nordic ID device **Admin Side** on global. (w three endpoints)

Expectations:

1. To update expired ubuntu servers for our products as free (AA studio, Secop, Telef10.az)
2. Deploy them.
3. Production of Nordic ID device.
4. Phishing 40 percent endpoints will be done
5. If Topdanci UI will be available, endpoints will be started.
6. Maybe -> i will make report management system for us. (maybe, maybe, maybe).
